

# Applied AI for Civil & Environmental Engineering

We offer applied AI training, from risk awareness to real-world deployment.

[www.baigroupllc.com](http://www.baigroupllc.com)

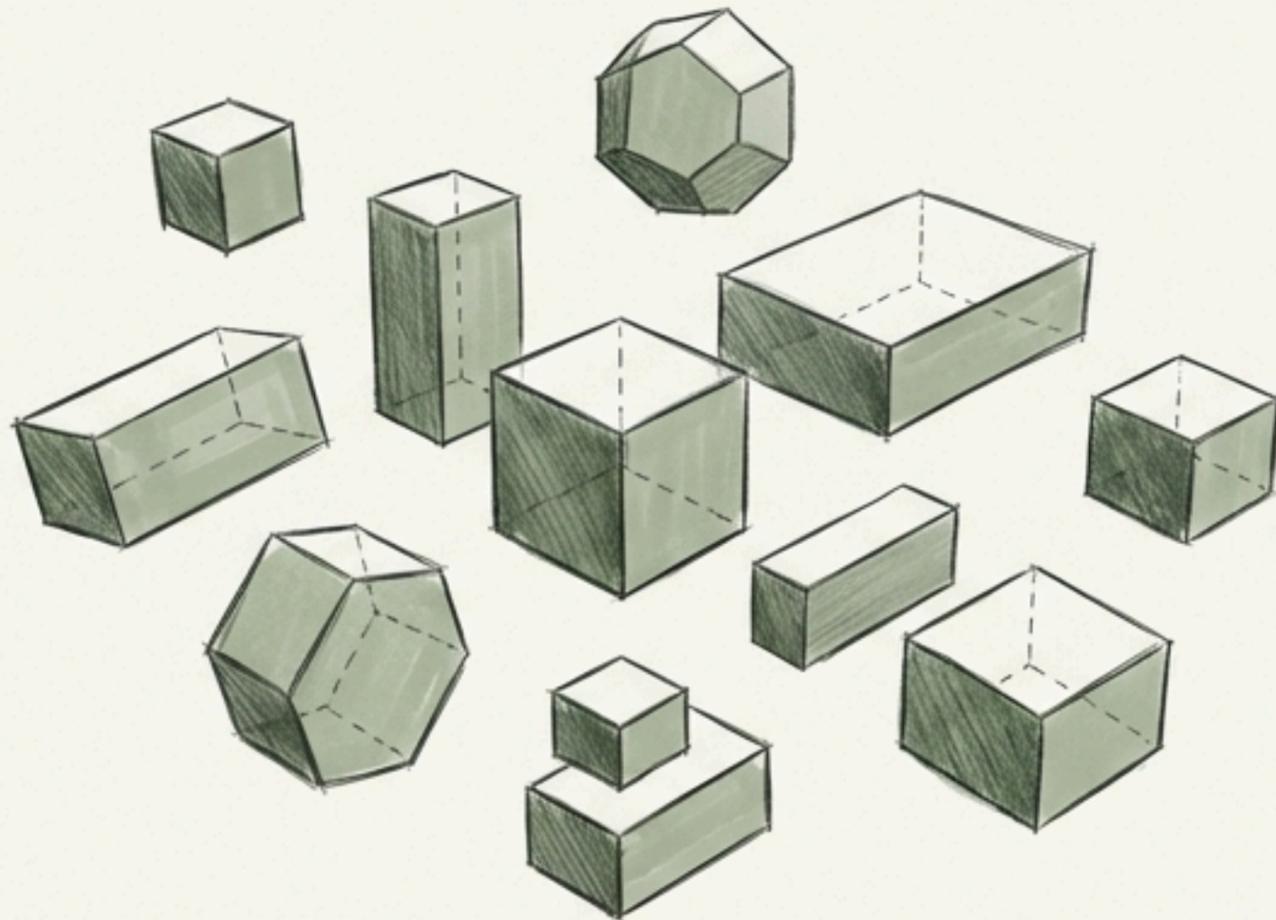

# Explore BAI's Applied AI Training Tiers:

Service Tier	Duration	Primary Use Case	Target Audience
Lunch & Learn	1 hour	Risk overview & awareness	Leadership
Hands-On Workshop	Up to Half-day	Foundational system introduction	General Staff
BYOD Workshop	Half-day	Secure proprietary workflow building	Specialized Teams
Multi-Day Training	1 to 3 days	Deeper cross-functional application	Departments
Pilot Program	4 to 12 weeks	Real-world testing (defined use cases)	Enterprise-wide

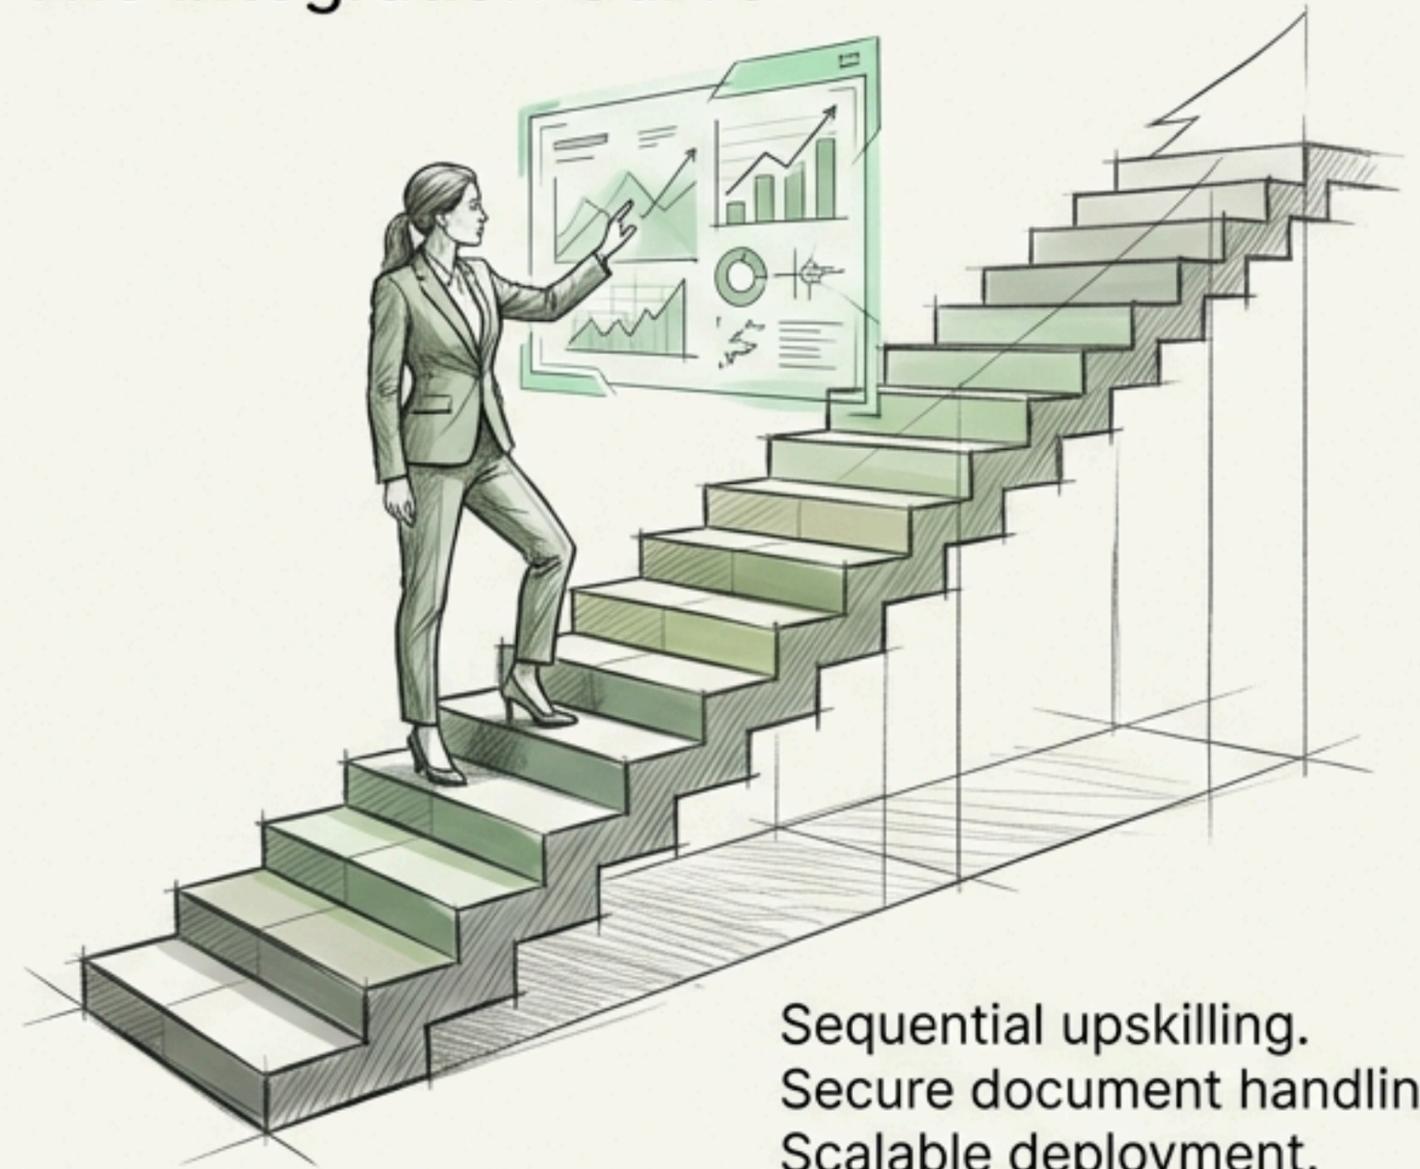

# Build a scalable AI capability across your organization

## Fragmented Adoption

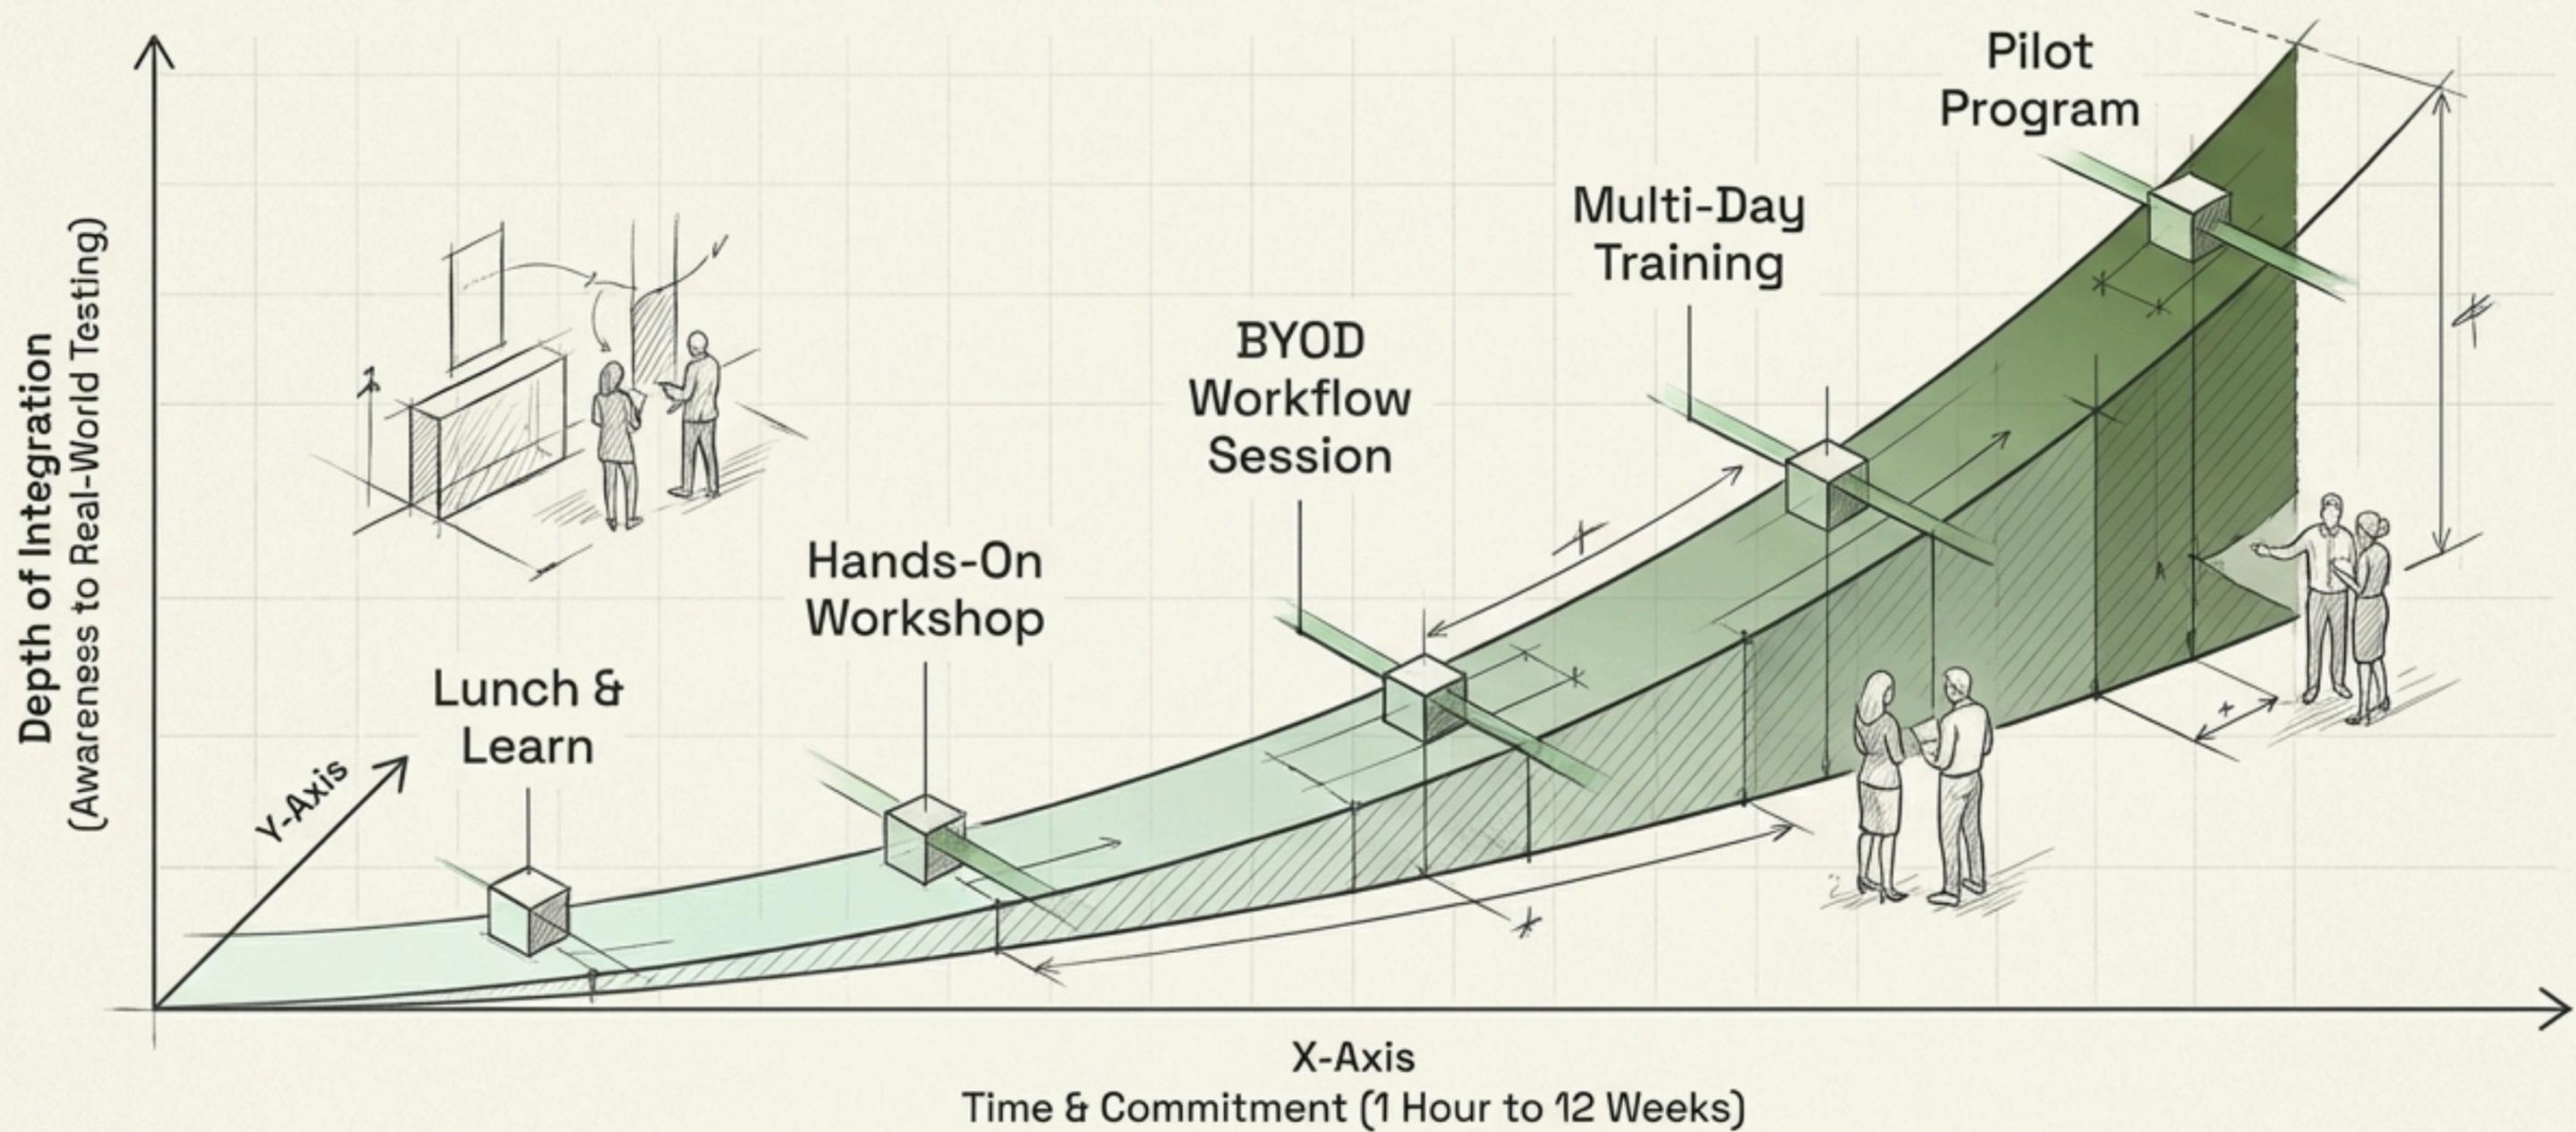

Isolated workshops.  
Disconnected tools.  
Unmeasured risk.

## The Integration Curve

Sequential upskilling.  
Secure document handling.  
Scalable deployment.

# The Capability Escalator scales with your organizational readiness.

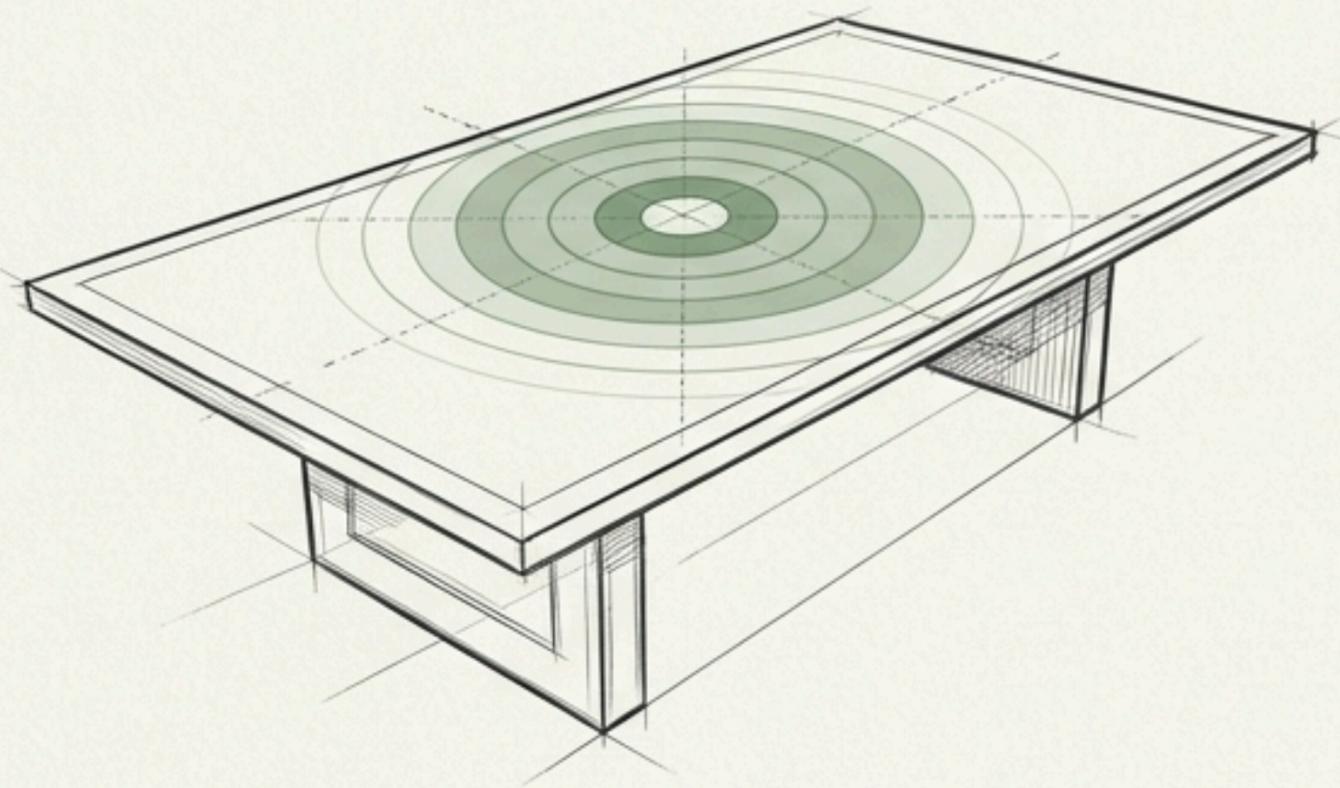

# Foundation modules establish leadership awareness and baseline staff competency.

## Lunch & Learn

Duration: 1 hour

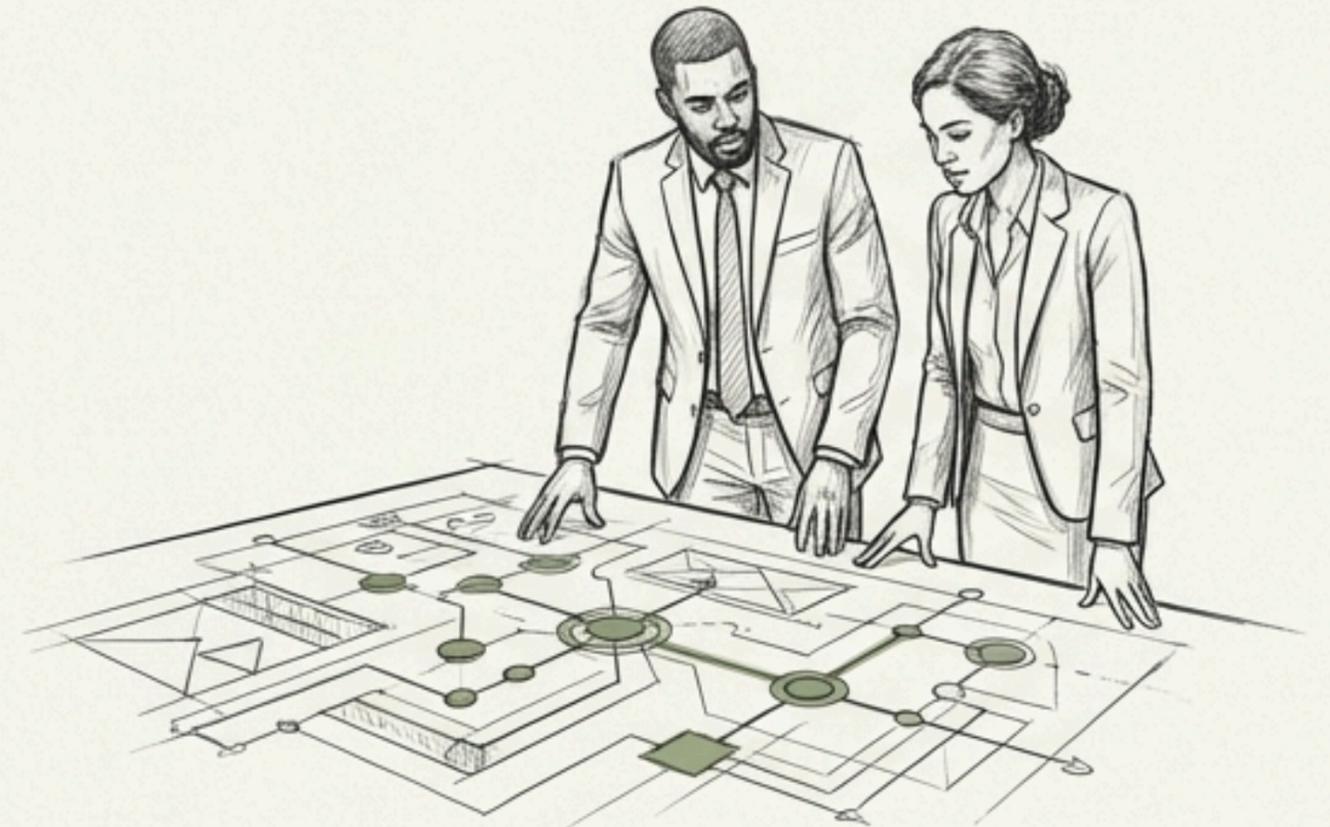

Focus: Leadership awareness and risk overview.

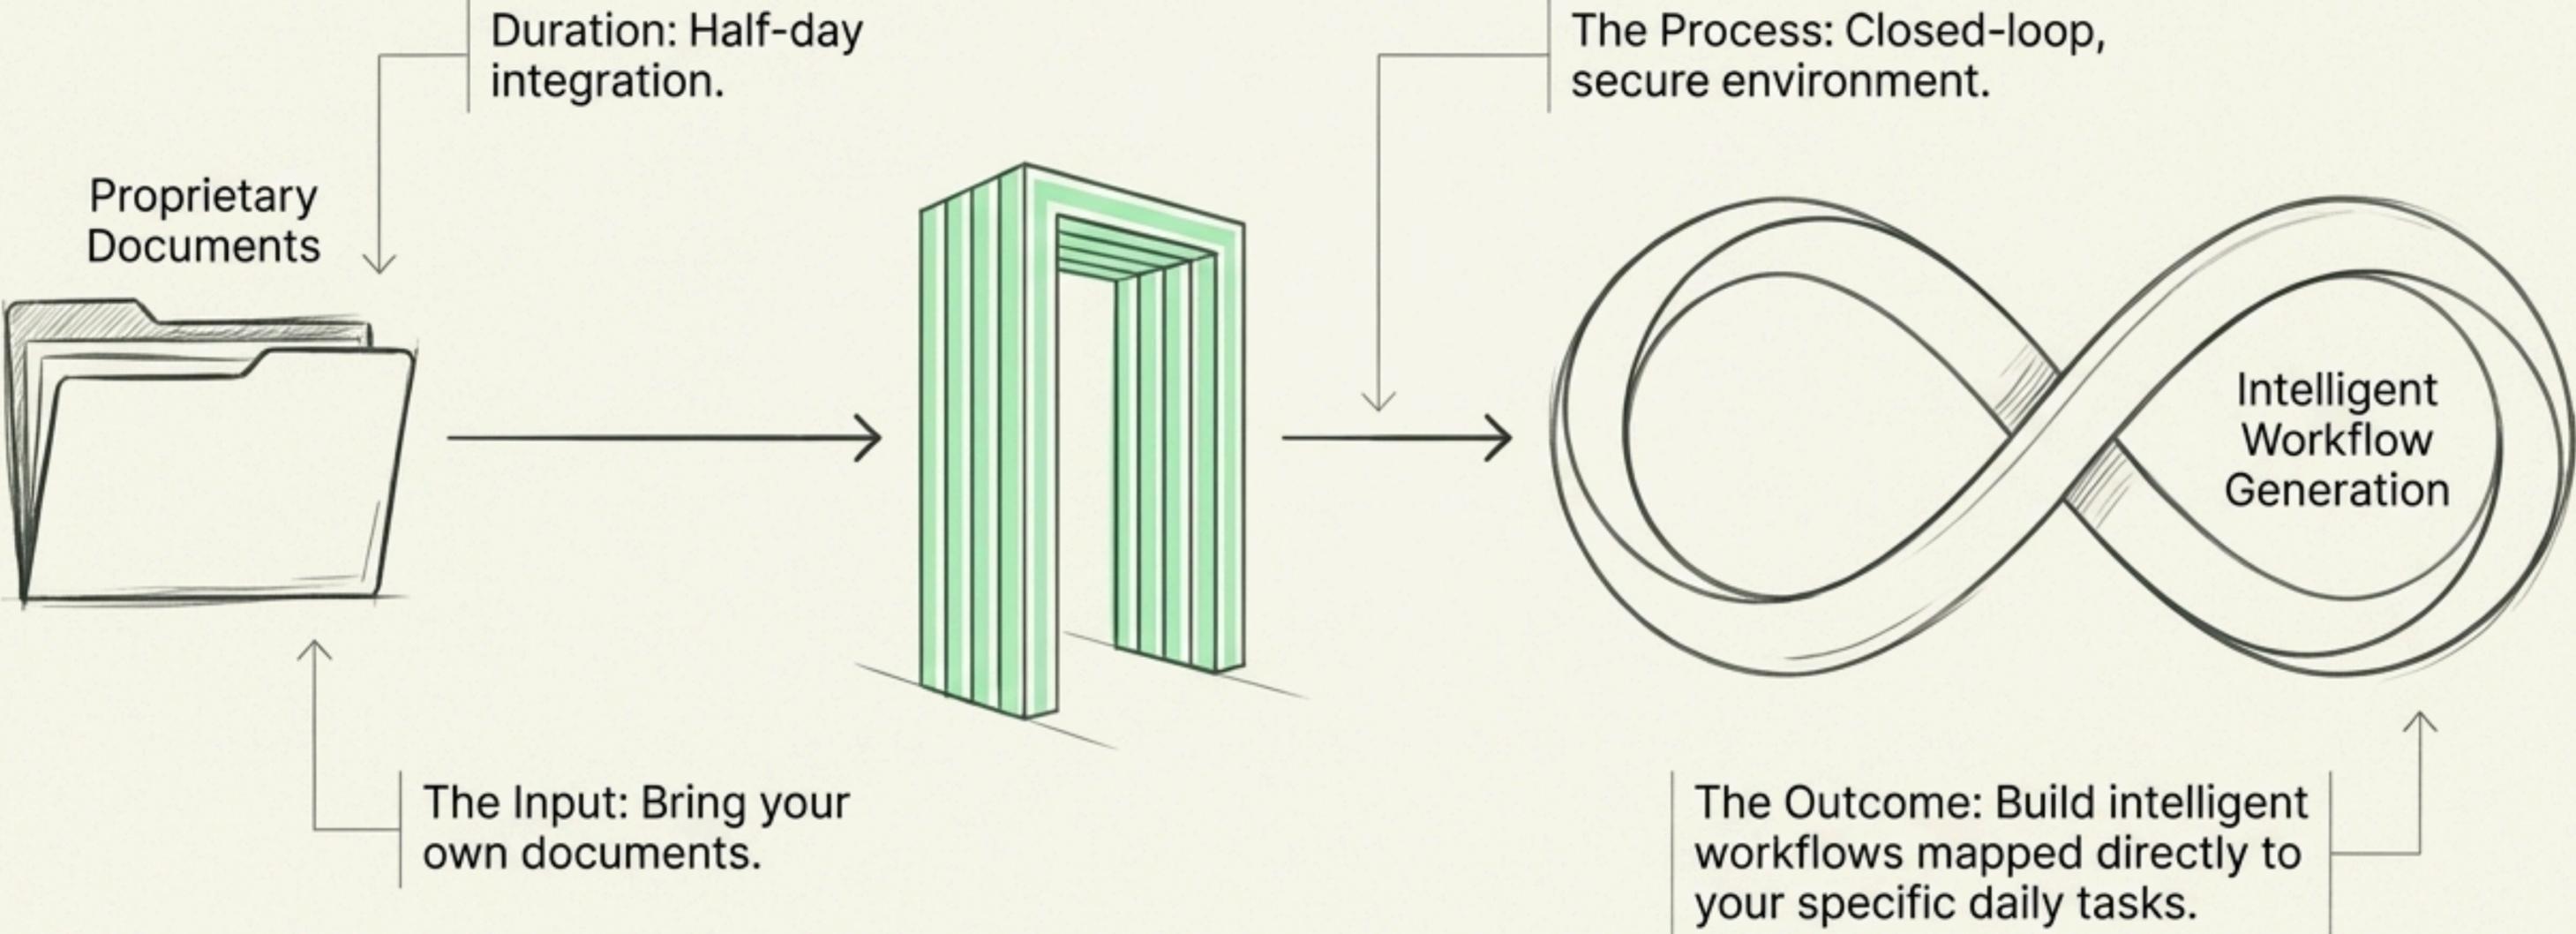

## Hands-On Workshop

Duration: 2 hours to Half-day

Focus: Hands-on introduction for staff.

# The BYOD Workshop safely bridges theory and actual enterprise application.

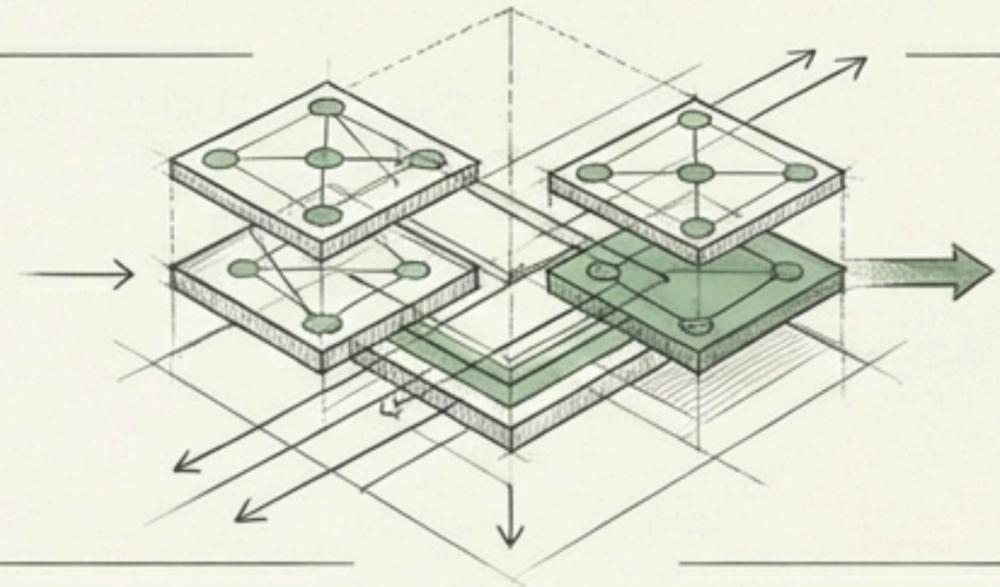

# Deep deployment moves beyond training into real-world operational testing.

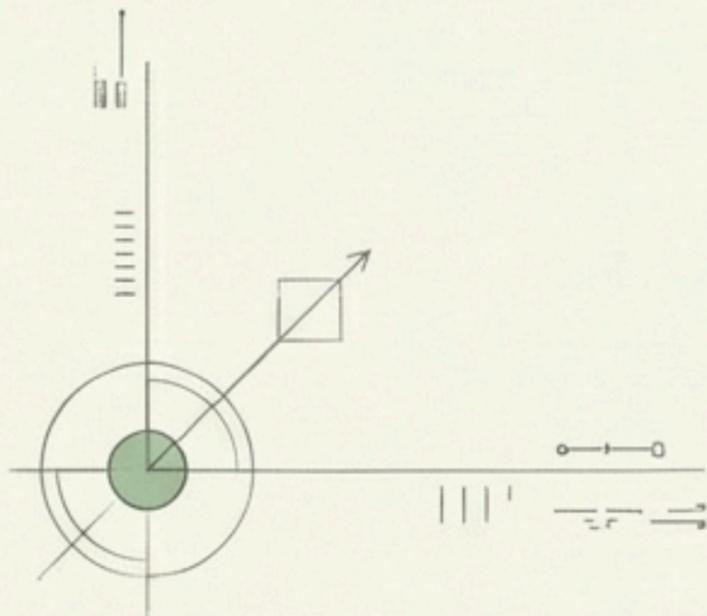

## Multi-Day Training

Parameters: 1 to 3 days.  
Focus: Deeper application across teams.

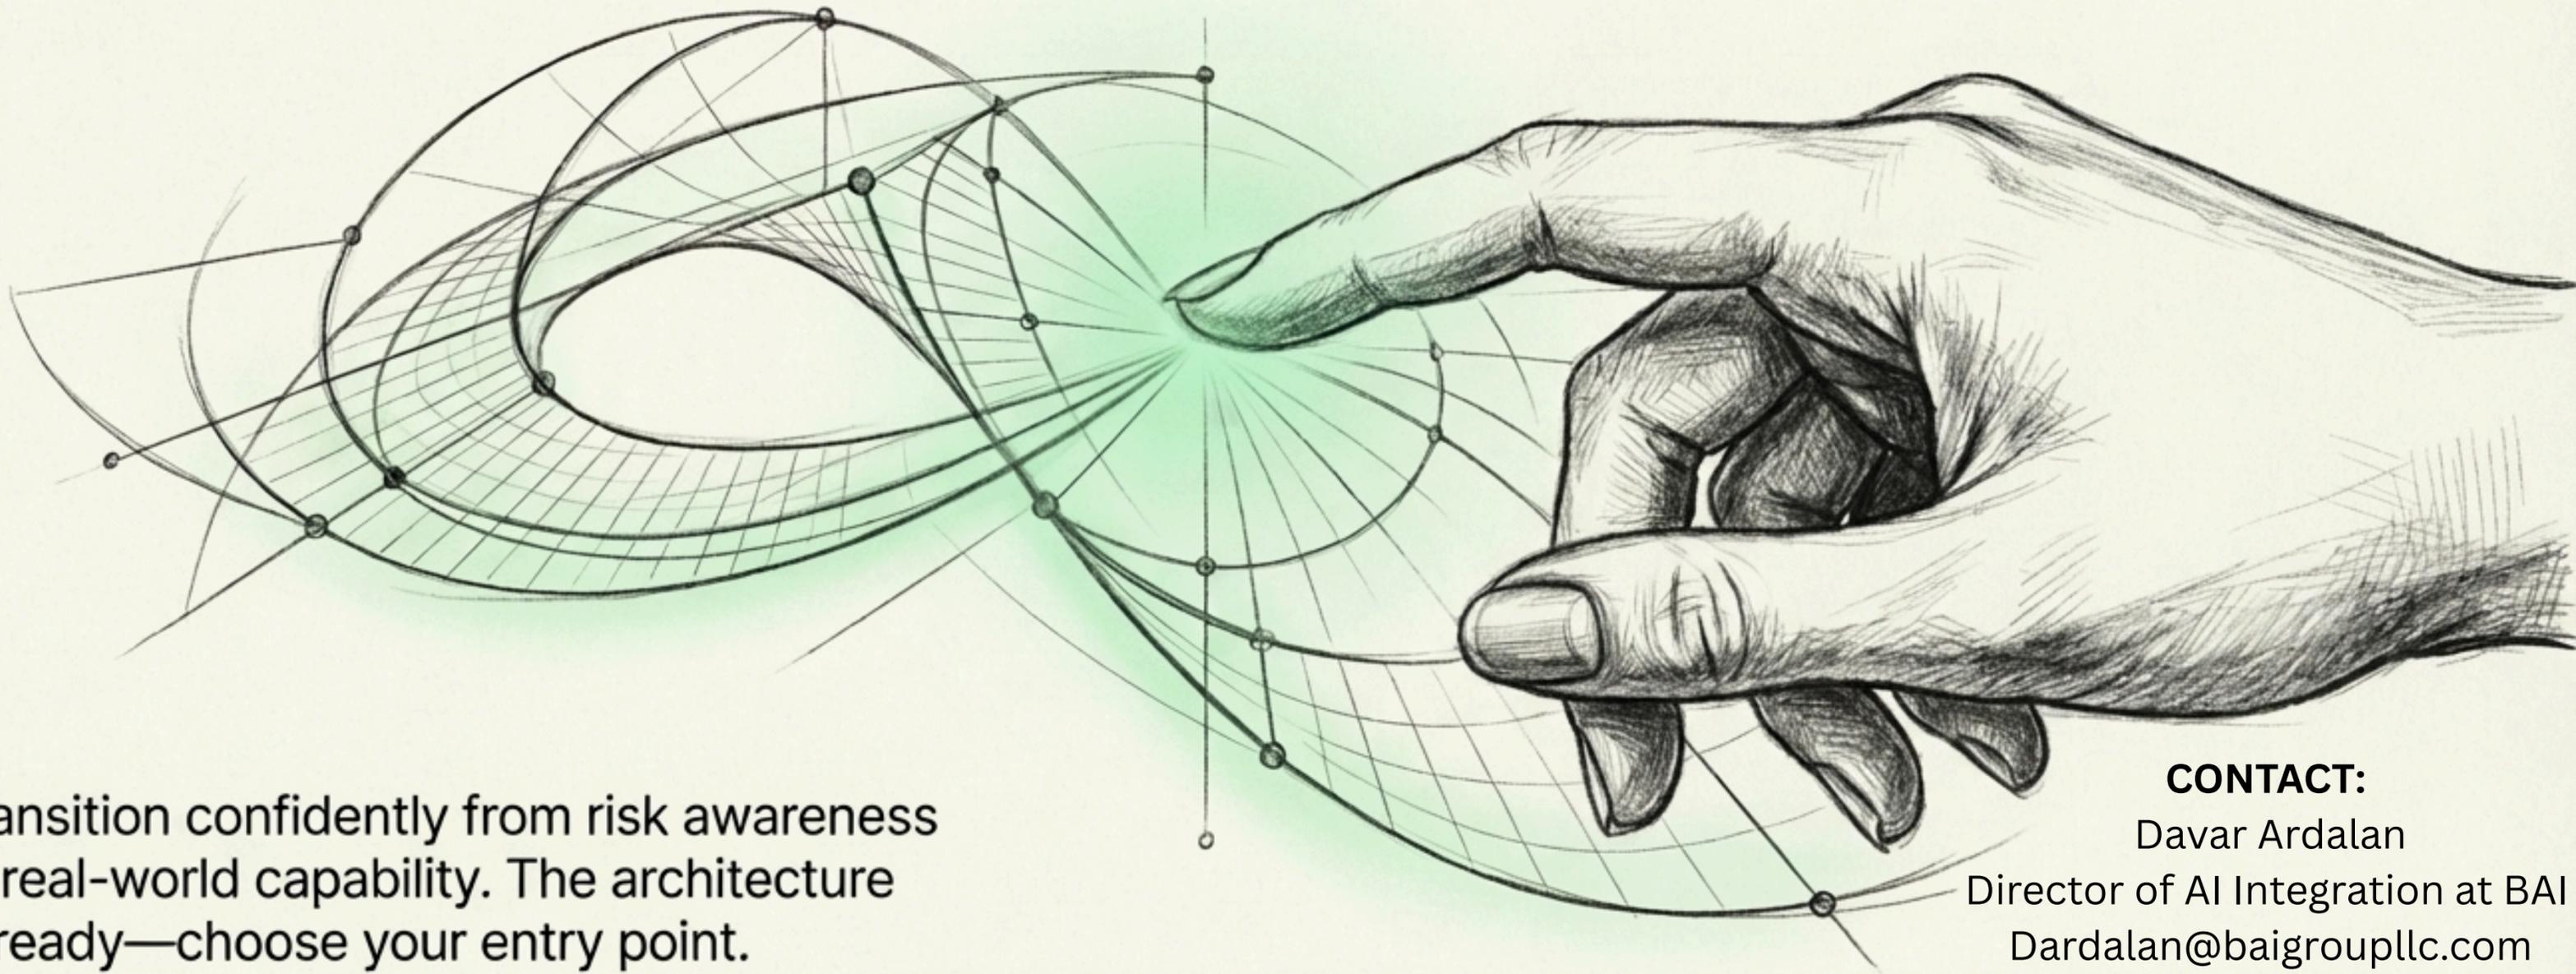

## Pilot Program

Parameters: 4 to 12 weeks.  
Focus: Real-world testing with defined use cases.

# AI succeeds when people lead the change, not just the technology.

Transition confidently from risk awareness to real-world capability. The architecture is ready—choose your entry point.
